	0.5	2nd NOTE Fig2	ed	The case where “lead appointed party” and “appointed party” comprises as one entity is very often given in the SME Environment of the German and French market. This is not properly reflected by Fig2.	Fig 2 should show also the coincidence of B and C. One way of doing so could be to have part of the figure without C Use the French proposal for this figure.	
	Whole document		ed	As stated above: Having only appointed parties and no lead appointment is the normal case in SME markets. This standard will be more acceptable with a minimum of “lead appointed party”	delete “lead” in “lead appointed party” e.g. 5.1.1. 2nd paragraph	
	0.5	Fig2	ed	Change of Information Delivery Process		
	Whole document		ed	The TG SME had handed in comments and proposed changes. They do not appear in Part 2 neither has happened a editorial discussion between the TG and the Editor	accept proposed changes from Oct/Nov 2017	
	5.3.6.		ed	“risk register” should not be mandatory		
	5.7.2		ed	To <i>review and authorize the (whole) information model</i> is not necessarily the task of an appointed party, or the lead appointed party. It refers to the function of the BIM manager, or BIM coordinator handling both the PIR and EIR	Describe the function according to activity 4.1 in fig. 8	
	12.1.		ed	Status / Suitability Codes are missing	see proposal in separate document
